

**TAKE YOUR NEXT STEP**

# **NASA JACK EDDY POSTDOCTORAL FELLOWSHIPS 2024**

**2024 CALL FOR APPLICATIONS**

**These fellowships are designed to train the next generation of researchers in the field of heliophysics.**

**Heliophysics embraces all aspects of the Sun-Solar System, and includes many of the basic physical processes found in the laboratory, the solar system, and throughout the universe. These processes generally involve the interactions of ionized gases (plasmas) with gravitational and electro-magnetic fields, and with neutral matter. The physical domain of heliophysics ranges from deep inside the Sun to the Earth's upper atmosphere.**

**Jack Eddy Fellowships provide a unique opportunity to go where few have gone before. Fellows are UCAR employees and receive a fixed annual salary, plus UCAR's benefits and allowances for relocation and travel.**
