
2023 Ocean Surface Topography Science Team Meeting

Tuesday, November 7 2023 - Saturday, November 11 2023

The 2023 Ocean Surface Topography Meeting will occur 7-11 November 2023 and will include a variety of science and technical splinters. These will include a special splinter on the Sentinel-6 Validation Team (S6VT) feedbacks (chaired by the Project Scientists), and a splinter on Coastal Altimetry. Sentinel-6A Michael Freilich being now the reference mission since April 2022, contributions that support this mission are highly encouraged. First results on SWOT (at least from nadir altimeter) are also very welcome.

We recall that all the presentations (oral or poster) will have their counterpart in the Forum. Please upload your presentation through your aviso account as soon as possible (<https://ostst.aviso.altimetry.fr/>, where your abstract was submitted) and at the latest at the end of the meeting.
